

SECURITY OBJECTIVES

The Operational Safety objectives of **CLIPPER NATIONAL AIR** are:

1. Maintain and continually improve the effectiveness of our Management System.
2. Identify all the dangers of the operation, including those that may arise from any change that is made and those that may be created by subcontracted companies, analyze their risks and have effective mitigating measures and keep them controlled over time.
3. Ensure the qualification and competence of all personnel.
4. Constantly promote voluntary event reporting and report all mandatory reporting events.
5. That all Company personnel be aware that operational safety is their first responsibility.
6. Comply with all legal requirements and applicable regulations.
7. Have the resources to comply with them.
8. Ensure that subcontracted companies meet the standards and performance goals of **CLIPPER NATIONAL AIR**.

CLIPPER NATIONAL AIR will always take into account the security objectives established by the Spanish Operational Security Action Plan (PASO).

Any action that is determined to be taken in relation to the objectives will be set out in the Company's Action Plan.

To monitor the objectives, the indicators established to measure performance in terms of safety will be analyzed periodically.

They will be reviewed in the CRS and distributed to all staff **CLIPPER NATIONAL AIR** and to the Subcontracted Companies through the website, in conjunction with the Security Policy.
